

CONTENTS

1. Introduction	4
2. Rationale behind performance testing in power and team sports	6
2.1 Benefits for the athlete	6
2.2 Benefits for the coach and the team	7
2.3 Effective testing	8
2.4 What do tests measure?	9
2.5 What testing will not do?	9
2.6 Administering the testing	9
3. Physiology of muscle strength, power and endurance	12
3.1 Introduction to the structure and function of the neuromuscular system	12
3.2 Energy systems and pathways	15
3.3 Strength and power	19
3.3.1 Strength	19
3.3.2 Power	22
3.3.3 Aerobic power (aerobic fitness)	23
4. Speed	24
5. Agility and coordination	30
6. Reaction times	32
7. Testing athletic performance	36
7.1 Testing procedures	36
7.2 Powertimer tests	36
7.2.1 Speed strength tests	37
7.2.2 Explosive strength tests	39
7.2.3 Acceleration and speed tests	43
7.2.4 Agility tests	43
7.2.5 Reaction time tests	45
7.2.6 Anaerobic power tests	46
7.2.7 Aerobic power – 20-m multistage fitness test	49
8. Putting it together	50
8.1 Athletic development program	50
8.2 Planning for peak performance	53
8.3 From testing to training – How different athletic qualities can be developed?	56
8.3.1 Speed and acceleration	60
8.3.2 Strength	61
8.3.3 Quickness and agility	63
8.3.4 Speed endurance	63
8.3.5 Combining the aerobic training to speed, power and speed endurance training	65
9. Summary	66
References	68
